

(a) 物理模型：圆柱药材与第三类边界条件

(b) 一维径向求解域与节点式有限体积 (图示 $M=8$)

中心: $\partial T / \partial r = \partial C / \partial r = 0$ (对称)

表面: $-k \partial_r T = h(T - T_{\infty}),$
 $-D \partial_r C = h_m(C - C_{\infty})$

(c) 水分径向扩散示意
